

## **Benefits of Working with an Interior Designer**

The thought of hiring an Interior Designer can be intimidating and seems “expensive”. The truth is that a trained design professional can save you time and money and help you create the room of your dreams.

A designer will

- save you money by avoiding costly mistakes and bad purchases
- save you time by doing the legwork for you
- find innovative and unique solutions to your specific problems, needs, and desires
- spend time focusing on the details, which is the difference between a room that is OK and a room that makes you feel alive
- make you aware of unique choices available and give you the confidence to try something new
- make the most of what you already have
- have access to products beyond the chain retail stores, and tried and tested contractors and craftspeople
- communicate the design vision and expectations with contractors, installers, vendors and craftspeople to ensure the construction and implementation go smoothly and with less stress

***A well designed space looks like you spent more money than you did; it is pulled together with thought and coherence, and comfortable for your family and lifestyle. This is your home and the design, good or bad, will live there with you for many years.***

## **Working with an Interior Designer**

Working with a designer is a collaborative relationship, not one of superior and subordinate. It is important that you have trust and confidence in the designer that you choose for your project. A successful project relies on open communication between client and designer. You should feel free to voice your opinion on all decisions.

Before meeting with your designer, take time to define your likes, dislikes, and ideas.

Communicate your ideas with your designer, but keep an open mind; remember your designer is there to help you enhance your style and take it to a new level.

## **About Beautiful Habitat**

Beautiful Habitat was born of the belief that the home is a personal space; a habitat where you should feel completely at ease and which reflects your personality and the way you live. Tennille Wood, owner and Principal Designer, believes that everyone deserves a home that’s functional, beautiful and totally “them”.

We don’t have a signature design style or specific “look” that we create for clients. Instead, we pride ourselves on interpreting the needs of clients to define and enliven *their* style. Beautiful Habitat works throughout the Denver, Boulder, metro and mountain areas.
